OBJECTIVES

As a motivated fresh graduate in Bachelors of Science in Information Technology with Area of Specialization in Web Development and a hands-on experience in a professional environment, I bring proficiency in Web Developing. I have created UI/UX components using Figma and Canva, integrated APIs for frontend development, and explored generative AI through prompt engineering. During my recent internship, I polished my skills and am eager to grow further in the tech industry by contributing to innovative projects and advancing my expertise.

KEY COMPETENCIES

Technical Documentation: Proficient in writing comprehensive technical documentation, ensuring clarity and maintaining adherence to DRY (Don't Repeat Yourself) Code Principles.

Project Management: Skilled in setting and adhering to task deadlines, utilizing time boxing and practice on Agile methodology to ensure timely delivery of high-quality work.

Continuous Learning: Dedicated to researching and integrating best practices, industry trends, and the latest framework versions to continually improve development processes and outcomes.

Effective Communication & Reliability: Recognized for clear communication and dependability, ensuring smooth collaboration with teams while consistently delivering user-focused solutions and meeting project goals.

PROJECTS

CENTRALIZED PLATFORM FOR MISSING PERSON REPORTING AND TRACKING IN PAMPANGA

Full-Stack Developer · Capstone Project · Dec 2024 – March 2025

- Team Collaborator:** Worked closely with team members, shared ideas, divided tasks, and helped write the project documentation.
- QA Analyst:** Checked for errors, tested each feature thoroughly, and made sure everything worked smoothly before submission.
- Front-End Developer:** Designed the user interface using HTML, CSS and Vue.js to make the website clean, simple, and mobile-friendly.
- Back-End Developer:** Set up the server to handle data from the front end and store it in our Firebase.

EXPERIENCE

July 2024 to Oct 2024

Full Stack Developer - IT SQUAREHUB

- Frontend Development:** Implemented the interface improving the design of the Inventory System at IT Square Hub to a user-friendly, polished design, enhancing the general feel.
- Design & Aesthetic:** Responsible for the design structure and aesthetic, ensuring alignment with the company's branding and delivering a visually cohesive and intuitive application.
- QA Analyst:** Assumed QA responsibilities, testing the app, detecting bugs, and ensuring smooth functionality for a stable user experience before final rollout.
